

# **BUILDING SAFETY IN HOUSING 2020**

---

**Thursday 27 February 2020**

Royal Institute of British  
Architects, London

# Working together to make every home safe

There's nothing more important than the safety of our homes. Britain's building safety system is undergoing fundamental change and it's up to all of us in housing and construction to make that change a reality.

The Building Safety in Housing conference will provide the tools, insight and latest legislative updates to help housing associations be part of that change. It will be a space for collaboration, for sharing experience and for learning from and challenging each other.

Hearing from experts, early adopters, regulators and local government representatives, you'll exchange knowledge and share ideas on how to create a culture of safety in your organisation.

We'll explore case studies from the housing sector and beyond that have achieved fundamental culture change on safety, giving you the inspiration and information you need to make sure your homes are safe, secure, and ready for the future.
